## SUMMARY

Highly motivated Full-Stack Developer, adept at problem solving, with a visionary mind, and quick wit. Efficient collaborative skills. Effective at narrowing down issues to determine root causes and application of corrective solutions. Attentive listener with ability to provide articulate explanations. Able to show attention to detail in all aspects, regardless of the complexity of the situation. Always looking to improve knowledge and skills.

## TECHNICAL SKILLS

JavaScript, HTML, CSS, React, React-Router, Node, SQL, Sequelize, MongoDB, Mongoose, Express, JQuery, AJAX, Handlebars, Bootstrap, Firebase, GraphQL, Apollo Client, ORM, C#, C++, Swift, Terminal, and Git.

## EXPERIENCE

### Lighting Controls Specialist Performance Lighting Systems

2015 – 2018  
Irvine, CA

- Oversaw and carried out lighting controls programming on many large scale projects for high end clients such as Google, Sony, SnapChat, and Facebook using various systems including nLight, LC&D, and Fresco.
- Met with contractors prior to installation to provide information on proper methods and documentation practices.
- Worked with contractors and IT staff onsite during installation to provide troubleshooting techniques and ensure system stability and functionality.
- Provided clients with onsite post sales support to adjust, customize, and troubleshoot lighting system programming.

### Technical Analyst OpenText

2014 – 2015  
Tucson, AZ

- Provided professional technical support for the enterprise FoIP software RightFax via RDP and Voice Calls.
- Worked with various telephony systems, SQL databases, and 3<sup>rd</sup> party software that integrated with RightFax.
- Recorded extensive notes on all troubleshooting steps and wrote articles to document findings for future use.

### Sales Specialist Office Max

2013 – 2014  
Tucson, AZ

- Specialized in customer service and sales, provided key information about products and available protection plans.
- Tech expert at "ctrlcenter," diagnosed issues and fixed customers computers on a daily basis.
- Key carrier, primarily closing manager. Responsible for counting cash drawers, bank deposit, closing store, etc.

## PROJECTS

### Stream Finder -

Link to Github: <https://github.com/JDVapor/Stream-Finder>

Link to Deployed Project: <https://jdvdvapor.github.io/Stream-Finder/>

- Get information about and find where you can stream your favorite movies and TV shows.
- Completed user authentication, verified incoming data from api calls and proper display of data.
- Uses JavaScript, HTML, CSS, AJAX, Firebase, and JQuery.

### Sports Match - (WIP)

Link to Github: <https://github.com/JDVapor/Sports-Match>

- Schedule and post sporting event meet ups, other users can join the events.
- Built database models, created forms, front-end back-end integration, user authentication, etc.
- Uses JavaScript, HTML, CSS, Handlebars, Express, SQL, Sequelize, Node, bcrypt, and jwt.

## **The Seven Kingdoms - (WIP)**

**Link to Github:** <https://github.com/clam1987/The-Seven-Kingdoms>

- Game of Thrones themed RPG.
- Set up front-end routing, components and their structure, battle engine combat algorithm, etc.
- React, React-Router, Redux, Mongoose, MongoDB, Express, Node, Passport, bcrypt, and axios.
